FOREWORD

Spoštovani,

V veliko čast mi je, da vas lahko nagovarjam v imenu društva IAESTE na kariernem sejmu Teconomy. Kot kaže bo leto 2023 polno priložnosti, da se znova spopadamo z izzivi in priložnost, da se dalje razvijemo in gledamo v prihodnost. Ne radi govorimo o boju s pandemijo, ki je dodobra prizadela vsa področja življenja. študentske organizacije in društva smo iskali vsako priložnost, da ostanemo to kar smo, da ostanemo del nečesa večjega in da se še naprej borimo z vsakdanom in prihodnostjo.

Društvo IAESTE v 2023 znova išče priložnosti, da bi študentom še naprej omogočali nabiranje izkušenj, da se z našo pomočjo še naprej razvijamo in pripravljamo na vstop na trg dela, kar je eden od najtežjih korakov mladostnih dni. In izjemno priložnost želimo ustvariti z organizacijo kariernega sejma Teconomy 2023, na katerem se nam je pridružil veliko različnih podjetij in organizacij. Sejem je izjemna priložnost za spoznavanje bodočih delodajalcev, kaj lahko pričakujemo od njih in kako se lahko na trg dela dobro pripravimo. Poleg tega pa bo izjemna priložnost, da oživimo tradicionalni dogodek, da se družimo, da spregovorimo iz oči v oči in si podamo dlan v dlan. Prihodnost je vedno bila negotova in tako bo tudi ostalo. Danes pa si lahko ustvarimo podlago, da nas le-ta ne bo presenetila. Zato predvsem mladim polagam na srce, da karierni sejem izkoristijo za sklepanje novih poznanstev, pridobivanje izkušenj, spoznavanje bodočih delodajalcev in vse kar Teconomy ponuja. Naj danes postane jutri in izkoristite dan namenjen prihodnosti. V imenu društva IAESTE vam želim veliko uspehov .

Srečko Zupančič, Mitja Smešnik, Tanja Kralj, Jana Drobnjaković.

Krka is an international pharmaceutical business group, composed of subsidiary companies and representations in over 45 countries, in addition to its parent company in Slovenia. It employs 13,000 people. In terms of financial and other indicators, it ranks among the top global generic pharmaceutical companies. The starting point and goal of all of Krka's activities are patients, whom they enable to maintain and strengthen their health with innovative products. With high-quality, safe, and effective medicines marketed under their own brand names, Krka helps treat 55 million people every day in more than 70 countries.

They produce 17 billion tablets and capsules per year in modern and technologically advanced production facilities at home and around the world. All elements of Industry 4.0 are present in Krka's business and production processes today. The most frequently used processes in their production involve automation, digitalization, artificial intelligence, robots, "big data" for decision analysis and process optimization, as well as forecasting future events. They are also implementing digitalization in other areas, such as human resources, where new communication methods are driving changes, in marketing and corporate communication, where they are adopting new technologies, and in management and corporate governance

What are you looking for in candidates?

Knowledge is a core value at Krka. We have long been aware that computerization and digitization are essential for the development and progress of our company. Did you know that at Krka, we use more than 2,000 IT services? In the future, there will be even more, which is why Krka requires top-notch IT professionals. We are also searching for them among students of natural sciences.

We invite students with a background in natural sciences who are interested in working in the fields of automation, digitization, artificial intelligence, and robotics. We expect new employees to be willing to work in an international company, exhibit independence and initiative in their work, demonstrate expertise, and be ready for continuous knowledge improvement.

Company website: www.krka.si

Dr. Gudrun Klimisch-Ibler

Arno Küssenpfennig

Customers, employees, applicants and freelancers – at **FERCHAU** we bring together ambitious and intelligent minds who have one thing in common: the ability to design, develop and implement sophisticated technological solutions to make the visions of the future a reality. Whether engineering or IT, virtual or on site – always flexible, committed and with a lot of passion.

FERCHAU stands for first-class technology services in engineering and IT. We offer a wide range of further training. Our in-house ABLEacademy offers you many options: from group seminars to language courses and E-learning to talent management programs. We are also happy to offer home office, remote work and part-time jobs.

Graz is one of the most important industrial and university centres in Austria. It is not only a place of research, but also a location where intense development and production takes place. The companies headquartered in Styria and Carinthia receive support for their engineering and IT activities from our Graz branch office.

What are you looking for in candidates?

Companies for mechanical engineering and plant construction, vehicle engineering, energy, semiconductors and information and communication technology are located here. Here, our specialists also focus on the areas of construction, basic and detailed engineering, automation, MSR as well as project and quality management.

Elektro Ljubljana

Elektro Ljubljana is part of Slovenia's electric power grid, and the largest of five electricity distribution companies in the country. The company's core activities are the management and operation of the distribution system, and the maintenance, construction and renovation of the electricity distribution infrastructure in central and south-eastern Slovenia, which covers 6,166 km².

What are you looking for in candidates?

One of the most important qualities that we find in a candidate is the passion for the work. We want to hire a candidate who is committed to the work so we are looking highly motivated candidates who have eagerness to learn and the ability to work effectively in a group. The candidate should be a team player and bring positivity to the work environment. As an employer we certainly value problem-solving skills, self-reliance and good communication skills.

What field are you hiring?

We offer challenges and opportunities for all candidates who are interested to pursue their passion for electrical and IT engineering.
